

CNNs - Inception V3

Thursday, January 28, 2021 9:57 PM

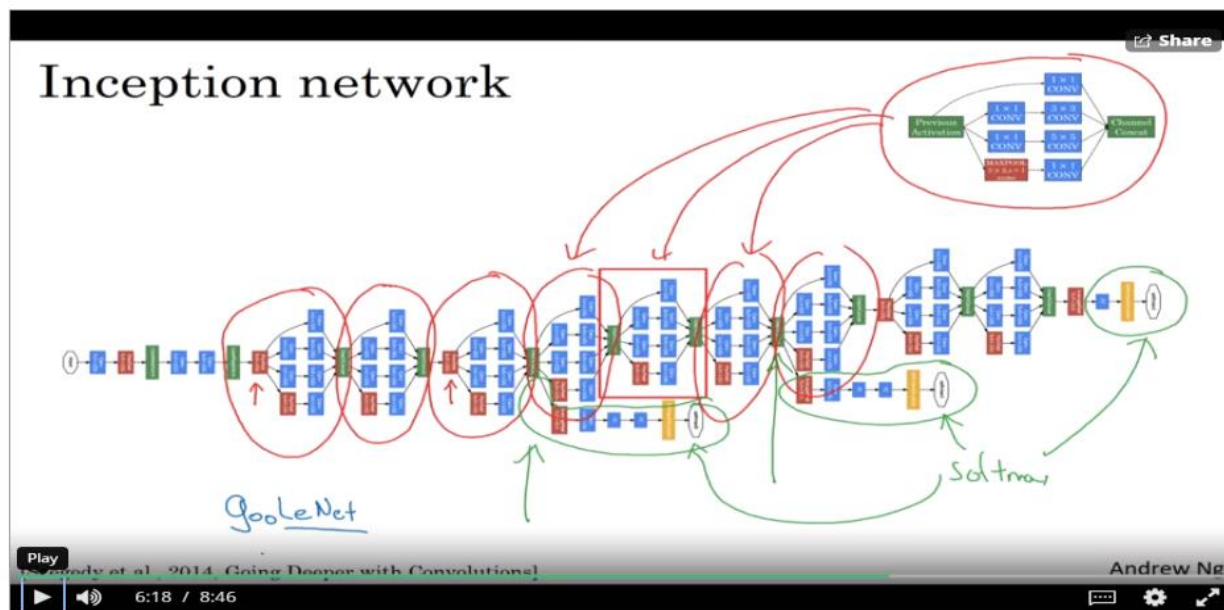

This is the inception module

Convolutional Neural Networks > Week 2 > Inception Network

The full inception network :

Inception Network

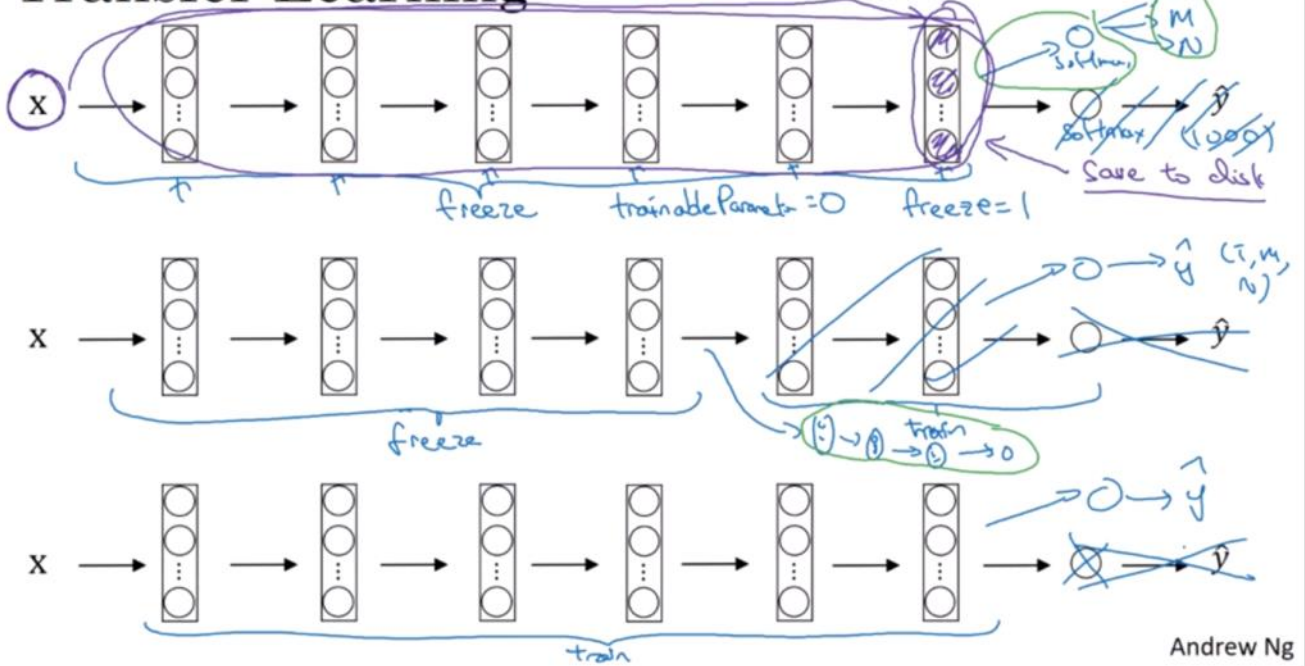

Transfer Learning :

- Transfer learning is where you use the parameters of a pre-trained model and just modify the last layer of the network in case our dataset is small.
- In case its large, we use the initial layers of the network .
- In case its tons of data, we just use the architecture of the network.
